Detailed Action

1. Claims 23-28 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made without traverse in Paper No. 5.

The Sequence Listing filed 2/14/03 is acceptable and has been entered.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 20, 22 and 29-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: The step(s) whereby the transformed host cells containing the desired gene (which encodes a protein lethal or harmful to the host) are selected, i.e. the step(s) between steps (ii) and (iii) of claim 20. If the desired gene encodes a protein lethal to the host, it is unclear how the cells containing this gene are selected since expression of the gene is lethal to the host.

Art Unit: 1636

Claim 20 is vague in that applicants recite a method for isolating a desired gene wherein "...DNA fragments of obtained from DNA containing the desired gene..." are inserted into a plasmid vector but there is no step(s) whereby the DNA fragments containing the **entire desired gene** are selected or differentiated from DNA fragments which contain part of the desired gene or do not contain the desired gene.

Claim 20 is also vague in the recitation of the phrase "...inserting DNA fragments of obtained from...". Deletion of the word "of" would be remedial.

Claim 22 is vague in that it depends from canceled claim 21. Claim 31 is also vague in that it depends from claim 22, which depends from canceled claim 21.

Claim 30 is vague in the recitation of obtaining a DNA fragment containing a desired gene by **PCR-based** amplification using a DNA containing the desired gene. It is unclear what a "PCR-based amplification" protocol encompasses. It is unclear what procedural steps are involved here, i.e. is the DNA containing the desired gene used as a primer?

Claim 31 is vague in that there is no antecedent basis for the term "said plasmid vector" in claim 22.

No Claims are allowed.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1636

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
